- Founded in Sweden and have delivered whistleblower solutions for 10 years.
- European client base, with clients of all sizes and from all industries, incl public bodies.
- Strong focus on IT Security; ISO 27001 certified, GDPR compliant with hosting in Europe.

Functionality in detail

Reminders and alerts

Subscribe to reminders and receive alerts for new cases, messages from the whistleblower and when deadlines are approaching.

Redaction of sensitive information

Protect the identity of the whistleblower by redacting sensitive information and creating anonymised copies of a case.

Additional reporting channels

Add additional reporting channel details, to support reports received from these channels. Manually create and save cases from additional channels in Case Management.

Standard and auto-replies

Keep communication consistent and don't miss important deadlines with standard and auto-reply messages

Report filtering

Label reports with a risk score and use the 'whistleblowing tag' function to filter out irrelevant or non-risk reports.

Case linking

Connect and link cases in your whistleblowing system that relate to the same misconduct or wrongdoing.
